direct fuel injection is a direct
fuel injection system for diesel
engines. On diesel engines, it
features a high-pressure fuel rail
feeding individual solenoid
valves, as opposed to a
low-pressure fuel pump feeding
unit injectors. Third-generation
common rail diesels now feature
piezoelectric injectors for
increased precision, with fuel
pressures up to 2,500 bar. In
petrol engines, it is used in
a Gasoline direct injection engine
technology. Fri, 11 May 2018
