Mnemonics are used to help
memorize the electronic color
codes of electronic components
such as resistors.. The first letter
of the color code is matched by
order of increasing magnitude.

List of electronic color code
mnemonics - Wikipedia - A
fluorescent lamp, or fluorescent
tube, is a low-pressure
mercury-vapor gas-discharge
lamp that uses fluorescence to
produce visible light. An electric
current in the gas excites mercury
vapor, which produces
short-wave ultraviolet light that
then causes a phosphor coating on
the inside of the lamp to glow.
